Multi-Taskers!

As much as we love our 10-step KBeauty Routine, sometimes we just don't have the time to dedicate to each step, especially on busy, rushed mornings! That's when multi-tasking skincare products become lifesavers. These versatile KBeauty products can be used in place of two or more steps in your skincare routine, or for many different uses, helping you to save time and space. These multi-taskers are great for traveling!

Blithe Splash Mask

It's a toner, it's a mask...it's something unique all on its own! The Blithe Splash Mask is a concentrated moisturizing liquid that you mix with water and splash on your face for an instant moisturizing and toning treatment.

- Splash it on your face in the shower and rinse off to save time, skipping your toner step and going right to your serum step.
- Use it as a morning rinse instead of your cleanser, and skip your cleansing and toning steps.

J.ONE Jelly Pack

The famous J.ONE Jelly Pack can be used in a multitude of different ways. This lightweight gel nourishes your skin while tightening pores, smoothing the skin's surface, and deeply hydrating the skin.

- Use it as a combination moisturizer-primer step under your makeup. This pack makes an excellent base for makeup with its unique "grabby" finish.
- Use it as a light moisturizer + sleeping pack as the last step in your skincare routine.
- Use it as a gel moisturizer during the day under sunscreen - the antioxidants in the jelly pack help to protect against environmental stressors.

Son & Park Beauty Water

The cult classic Beauty Water needs no introduction. This mildly exfoliating liquid can be used as a cleanser, exfoliator, and toner, or all in one.

- Use it to cleanse, tone, and gently exfoliate your skin in the morning all in one step, allowing you to skip your cleanser and toner steps.
- Use it to remove light makeup when you get home (but do follow up with a deeper double cleanse before you go to sleep) while gently moisturizing and exfoliating your skin
- Use it as a cleansing toner after removing your makeup to sweep away any debris or makeup left behind

Pyunkang Yul Essence Toner

This essence-like toner, perfect for sensitive skin, can be layered several times and used in place of your toner, essence, and even serum. You can use this for the 7-Skin Method (layering a toner seven times) and the toner will build up a moisturizing film on your skin that can even replace your moisturizer in a pinch.

- Apply a thin layer all over your face and pat in with hands until tacky and mostly absorbed, then apply a second layer. Repeat as desired.
- Use in place of toner, essence, and serum, and finish with a moisturizer. If used in enough layers, you can even skip moisturizer!
